MIS Client Security Standards

1 Our Philosophy: Layered Security

We layer multiple security controls, so that if one is bypassed, others are in place to stop an attack.

This standard isn't a sales catalog; it's the protection we believe is essential in today's threat environment.

2 The Minimum Standard (must haves)

Huntress SOC/MDR

What is it?
24/7 human security team monitoring your devices.

Why it's important:
Catches what automated tools miss, stopping threats before they cause damage.

Huntress ITDR

What is it?
Protects your cloud accounts, especially Microsoft 365

Why it's important:
Secures your data where it lives now – in the cloud. Essential for remote work.

Watchguard Firewall

What is it?
The primary gatekeeper for your office network.

Why it's important:
Your first line of defense against internet-based threats.

3 Additional Recommendations (strengthening your defenses)

Inky Email Security
Flags suspicious emails right in your inbox

Huntress SIEM
Provides the essential "source of truth" for any security investigation or insurance claim

Microsoft 365 Policies
Hardens the security of your entire Microsoft 365 environment

DUO/MFA
Adds a critical simple layer of protection to your logins

365 Backup / Recovery
ensures your critical data can be restored quickly

Penetration Testing
Proactively finds and fixes security weaknesses before attackers can

4 Why This Matters

To Manage Shared Risk:
Our fixed-fee service model means we share risk with our clients. Establishing a strong security baseline is essential to protect your business from common threats, which in turn allows us to provide our services effectively and predictably.

To Fulfill Our Advisory Role:
Our responsibility is to keep you informed about the evolving threat landscape. This standard represents our recommendation for the protections every business needs to operate safely. We provide the right information so you can make the best decisions for your organization.
